

THANK YOU TROPICAL AUDUBON SOCIETY

GREEN MOBILITY NETWORK 

On February 13, 2016 Friends of Ludlam Trail partnered with Tropical Audubon Society for the Winter Backyard Bird Count.

On this day, 17 participants walked approximately 4 miles of the Ludlam Trail while identifying birds found along the corridor. All birds were logged into the e-bird database for scientific reference. Many thanks to Tropical Audubon and volunteers for their contribution to the conservation of this beautiful Miami corridor! We look forward to future partnerships!
